## Don't You Think

it is a mighty convenient thing to be able to step into our store and buy custom-tailored clothes ready-to-wear, that will fit and satisfy you thoroughly? That is one reason why so many men who wish to be well dressed are today wearing

### STEIN-BLOCH SMART CLOTHES

Another reason is because they cost about one-half less than the made-to-order clothes, require no special fitting and you need not wait for them—they're fit-to-wear, the very day purchased.

Stein-Bloch Smart Clothes are worn today by men of means, who could not be won back to the costly-to-measure-made habit by the most seductive offers—because no better clothes are made.

STEIN-BLOCH SMART SUITS AND SPRING OVERCOATS,  
\$15.00 to \$35.00.

### ALWAYS SATISFACTORY

THAT'S WHAT PEOPLE SAY OF THE WORK WE DO. It's because we use the best White Lead we can buy, absolutely pure linseed oil, only the most durable and expensive colors, and employ none but skilled workmen. The kind of painting we do costs a little more than some others charge, but it's "always satisfactory."

S. STEPHENSON, Practical Painter, King Street.

## WITH BIT AND SPUR

### Island Polo Players to Meet Again Today.

### Kauai Will Put Up the Game of Their Lives.

### A Perfect Field and Fearless Players Promise Brilliant Match at Moanalua.

The second game of the polo match series between Oahu and Kauai teams will bring a big crowd to Moanalua this afternoon. The beautiful environs of the turf arena and the drive itself, winding through the park like grounds of S. M. Damon's residence, in themselves play no small part in the general attraction.

The game will be a hard one this afternoon. Spectators will see the Kauai boys clinging like leeches to the opposing riders in an endeavor to block their game and leave openings for their own attack. Arthur Rice and Bob Atkinson will hold pitched battle from the start unless Judd plays, when he will do the hustling for Oahu. Scolding, who failed to show up in his usual form last Saturday, possibly the masquerade had something to do with this, will be keyed up to his tightest tension and has perhaps the stiffest fight of all on his hands, pitted as he is against a man of much greater experience, cool headed, sure hitting Charlie Dole.

With the fighting quartet, Castle and Dillingham for Oahu and Charles Rice and Malina for Kauai, the brilliance of the play generally rests. There is little to choose between the men for general clan and dash. Malina is a sure hitter but has the fatal tendency of gallery play. His riding and saving of his horse is first class. Castle's mallet work is to the full as good as Malina's, but he is not as well mounted. He is better coached and backed up by Dillingham than is Malina by Rice. Dillingham's work for cool headed survey of the situation and faultless stick handling is on a par with Dole's. He needs however another good mount for the last period. Charlie Rice showed his abilities in the last two periods of Saturday's game and he can be relied upon to play an even game throwing away no chances.

Summing up it seems as if Kauai possesses a margin of odds on their mounts offset by the better team work of Oahu. Kauai played a substitute Saturday and Oahu could have done better had Dillingham followed the lead. Looked at carefully and candidly it seems an even game, while a Kauai victory would be a very popular one.

The ball will be thrown in at three o'clock and to those who are not initiated the process of throwing in the ball might be interesting reading. Were it not for the necessity of the ball being put into play by some one other than the players, the necessity of a referee on the field would be obviated. That official could much better render decisions and be out of the way altogether by watching from a high stand in the center of the field outside the lines.

The ball is not thrown in at all, but dropped. The teams line up opposite each other, the ponies almost rubbing noses, the No. 4s usually laying back. The referee rides up closely and when centered, raises his arm, the ball being held loosely in the hand, with an overhead sweep, dropping the ball just as the full swing of the arm is passed. This is all done in one continuous movement rendering it impossible for the referee to favor either side, the writer has refereed many games and speaks advisedly. The ball drops to the ground and rolls, probably three to five feet, squarely among the ponies' hoofs. There were some amateurish comments as to the way the ball was thrown in on Saturday but all onlookers may rest assured that when the referee throws in the ball properly, there can be no favoritism, even unintentional.

The crowd, following the example of Saturday, will probably gather about two-thirty to secure good locations and the ponies of both teams will be out on the field warming up by that time. Buses will connect with the cars passing Fort Street at 1:38, 1:58, 2:08 and 2:28.

### IT CURED THE DOCTOR.

New Scientific Dandruff Treatment  
Recommended by a Physician.

Mrs. Mary C. Crawford, Oakesdale, Wash.: "Herpicide cured me perfectly of dandruff and falling hair."

Dr. E. J. Beardsley, Champaign, Ill.: "I used Herpicide for dandruff and falling hair, and I am well satisfied with the result."

Alf R. Kelly, 2195 Desadero street, San Francisco: "Herpicide put a new growth of hair on my head. Herpicide does more than is claimed."

Herpicide kills the dandruff germ. "Destroy the cause, you remove the effect"—cures dandruff, falling hair and prevents baldness. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

Hollister Drug Co., Special Agents.

A journalist sat for many weary minutes in the waiting room of one of our medical celebrities. His patience at an end, he called the servant and said: "My man, just go in and tell your master that if I am not admitted in five minutes I shall be well again."

## FIRE LAKES ABOUNDING

### Lively Last Week Was Mokuaweoweo.

### Mr. Thielen Describes a Night View of the Eruption.

### Molten Lava Springs Like Water From an Artesian Well.

G. P. Thielen, land court stenographer, and H. A. Baldwin, manager of Haiku plantation, Maui, last week ascended to the crater of Mokuaweoweo, the expedition having been arranged by Alfred W. Carter. They landed at Kailua on Wednesday morning and began the main ascent from T. C. White's, Kailua, at 1:30 p. m. the same day.

Their camping and their experience of cold that night were like unto the experiences of others who had done the toilsome journey. Yet they were blessed with delightfully clear moonlight and immunity from snow, rain or hail. The summit was reached at 1:30 p. m. on Thursday, after actual traveling time of twelve hours from Kailua. Mr. Thielen described the eruptive conditions to an Advertiser reporter yesterday as follows:

### CRATER IN DAYLIGHT.

"On arriving at the crater we found that the central cone was very active, ejecting lava every few seconds with an explosion very much like the blowing off of steam by a locomotive. The jets rose to a height of about 200 feet. There were other signs of fire in the immediate neighborhood of the cone."

"The cone stood on the rim of a circular space in which activity was shown all over, fire being also visible in the daytime. Eruptions were intermittent, occurring every few seconds, and throwing up ejecta to a height of from a few feet to possibly a hundred feet."

"Other evidences of fire appeared all over the floor of the crater, steam from apertures and fire occasionally visible during the day. Over in the corner, on the Kau side, there were also evidences of considerable activity. Great quantities of steam were being emitted."

### MAGNIFICENT NIGHT SCENE.

"At night the whole scene was materially changed. It then beggared description."

"A circle of activity in proximity to the cone resolved itself into a lake of pure fire, acting in some manner like a storm-tossed sea. Waves of molten lava dashed against the rocky margin."

"During the night eruptions were more frequent and more violent, while the volume of matter ejected was considerably greater, than in the daytime. There was a row of small cones running across the lake from the Kona to the Hilo side. Between twelve and one o'clock these vents suddenly became very active, ejecting a large stream of lava which continued for several minutes."

"At the same time the mass of lava in the larger cone rose to the surface and slopped over in a lake on the Kau side. About one o'clock the lake apparently got fuller than it could hold, for the lava ran out in three small streams on the Kona side, uniting in one stream some distance from the rim. These streams broke over afresh several times, with occasionally a tremendous eruption. The explosions sent matter high in air, which came down like showers of stars."

### AUXILIARY LAKES.

"To the left of the main lake, during the night, there were two small lakes almost in a straight line about midway between the wall of the crater and the main lake. A third lake was situated at the foot of the cliff on which we were standing. Neither of these smaller lakes seemed to have any walls. The one at the foot of the cliff, beneath our feet, had a little cone which broke out and boiled over like water from an artesian well."

"Almost the entire floor of the crater is gridironed with orifices through which fire gleams at night. The entire lower plateau, as it is called, has been filled up by the present eruption so as to be flush with the formerly higher level."

### UNFOUNDED REPORT.

"I can state definitely that there has been no flow out of the main crater. Dr. Douglas, who accompanied Mr. Fleming on the trip from which it was reported there had been a flow on Kau side, states that the story was unfounded and that Mr. Fleming must have been misquoted."

"I secured fifteen photographs, seven of which were taken at night. We found it intensely cold at the summit and the water in our cans was frozen with a crust of ice half an inch thick. There was considerable snow in the crevices on the summit."

### RECOMMENDS THE ROUTE.

Mr. Thielen and party—whose guides were Charlie Carr and David Nahale—left the summit at 9:30 Friday morning. The crater then showed about the same degree of activity as at their arrival. They reached Kailua in ten hours, having made the round trip in twenty-two traveling hours. Mr. Thielen strongly recommends the route they took by way of White's.

"The spectacle to be seen at its best," he said in conclusion, "must be viewed at night when it is more like a grand pyrotechnical display than anything else I can liken it to. The sunset which we witnessed on Thursday evening was a close rival to any volcano on earth."

## SPECIAL 10 PER CENT DISCOUNT SALE

This week we are offering 10 per cent. discount on all our printed wash fabrics of every description.

## Great Reduction In Prices

Ladies' Lisle Thread Lace Hose, fast black in all sizes, regular 50c. hose on Special Sale at 35c. or \$2.00 1-2 doz.

## FIREPLACE 20,000 YEARS OLD.

(Continued from Page 2.)

was a kingdom where dishes of gold were used in serving the nobles, where there were houses several stories in height, and where the king and his lords rode under golden canopies in canoes with twenty rowers on a side. Coronado did not find any of this golden splendor, but he did discover two Indian nations living only a few miles apart, one rude and barbarous, eating its meat raw, and fashioning rude implements of flint, the other making fine flint implements and pottery and living in houses, whose foundations still stand. His expedition proved beyond a doubt that either Kansas or Nebraska was the great centre of Indian population on the plains before the coming of the white man.

In later years Nebraska historians have conceded that Coronado never reached this State, although there is evidence to the contrary in the disinterment in Franklin county recently of a Spanish stirrup of Moorish design and in Red Willow county of a straight, two edged Spanish sword of sixteenth century design used upon suits of chain mail.

Kansas has the better of the argument, because lying diagonally across it for a hundred miles is a great limestone flint belt which bears evidence of many years use.

### PROPER CARE OF CUT GLASS.

With proper care cut glass should keep its purity for a hundred years. This cannot be done, however, if it is carelessly washed in greasy dish water or if exposed to extremes of heat and cold. Cut glass articles require much more care during the process of washing than those made of plain glass, because of the unequal thickness of the glass, which makes it expand and shrink irregularly. Warm water, the best castle or other pure soap and a stiff brush are the first essentials. Wash carefully in a good suds and brush thoroughly through all the cuttings. Rinse the glass in clear water of the same temperature and set to drain.

After five minutes put in a box of boxwood sawdust, filling all the cuts. This will absorb the moisture in the cuttings. Let it stand ten or fifteen minutes, then give it another brush through the cuttings with a dry brush or soft cloth. Wipe inside and out with a lintless linen cloth. By following these directions the original sparkle and cleanliness of the glass will be maintained. Shot should not be used in carafes, cruets, decanters, oil bottles, toilet and similar articles. It is apt to scratch. Plain everyday potato parings are the best cleansing agencies that can be employed. Let them remain in the glassware over night and then rinse out in tepid water.

When there are no stains a sponge fastened to the end of a stick will be found useful to wipe the inside of the ware. In washing cut glass put a folded towel in the bottom of the dishpan, unless you have one of the cedar tubs. To distinguish between the genuine hand cut glass and that where the pattern is bitten out by immersions in a corrosive liquid, look at the cutting. A greasy shading betraying dullness is never seen in reputable hand work.

### ITALY'S KING WANTS TO DANCE.

The London Chronicle says that the King of Italy, if he is to be entertained in England according to his heart's desire, must be given an opportunity to dance. His majesty is in all ways as excellent a visitor as he is a dancer. He has an open mind and a keen intelligence. He loves travel; he uses his eyes; he asks questions; attends to replies; and he remembers. The Queen of Italy is less enterprising than her husband as traveler and visitor. Her excessive home-keeping is the only fault the Italians find with her, unless it be her failure to learn to speak their language with a perfect fluency.
